

We dealt with this same issue with Dish Network. The continued efforts of companies functioning on dated technology to tie the hands of those who are working to meet the demands of an ever growing and changing consumer base goes against everything this nation was founded upon. The reality is that we are a capitalist nation and our economy can not recover fully if government continues to interfere in the natural workings of this economic system. Further, companies based upon old technology will continue to serve a niche in this economy as there are many people who do not need, desire, or are willing to pay for the additional technology and services of satellite radio. As a citizen and voter in this country, I am appalled by the continuing resistance to technology put up by wealthy, dated, dinosaur companies. This did not work with television and it will not work with radio either, the people of this nation will not stand for such a double standard.

Thank you,
